Course Structure Confirmation: Zukhanye Mayekiso

Belgium Campus iTversity hereby confirms that Zukhanye Mayekiso (ID No. 060410 1190 089) is currently registered for the Bachelor of Computing qualification (NQF Level 8, SAQA ID: 62689) at our institution.

The Bachelor of Computing is an undergraduate degree qualification registered at NQF Level 8 on the South African National Qualifications Framework (NQF). While NQF Level 8 is commonly associated with postgraduate studies in some international contexts, within the South African higher education system, it remains an undergraduate qualification.

The Bachelor of Computing is designed as an integrated undergraduate qualification that combines foundational, intermediate, and advanced computing competencies within a single programme. Due to the depth and complexity of the curriculum, the qualification is registered at NQF Level 8 and carries a total of 510 credits, which exceeds the minimum credit requirements of many conventional bachelor's degrees.

Academic results are therefore reflected as part of one continuous undergraduate qualification rather than separate undergraduate and postgraduate studies.

If I can be of assistance with any additional information, please do not hesitate to contact me at kritzinger.t@belgiumcampus.ac.za

Yours sincerely,

Mr. Thinus Kritzinger
Registrar
